HOLIDAY WORKSHOP

This workshop will offer an introduction to Edison Robots. Students will be able to work with our robots or purchase their own robot to continue their robotics and programming education at home after the workshop. The software is available on iPad, Android and the web.

Participants will be introduced to the capabilities of the robots, then develop their programming skills and compete in a series of challenges.

This workshop is ideal for High School students in years 7-12 interested in Computing, Information & Communications Technology and/or Engineering.

Maximum of 25 places per workshop.
