# BRING-YOUR-OWN-DEVICE (BYOD) IN MOUNT ANNAN CHRISTIAN COLLEGE

## ACCEPTABLE USE POLICY

### Preamble

At Mount Annan Christian College, we recognise that the use of technology in our society has grown tremendously and for most young people it is a vital connection to the world around them. Personal devices can enhance and enrich learning opportunities both at home and at school. While we believe there is no substitute for sound teaching and learning practices, we also recognise the potential value of technology in shaping our students' educational experiences and the new avenues it can offer for learning.

### 1. Purpose

1.1 As we prepare students for life in the 21<sup>st</sup> century we must equip them with the skills to utilise technology responsibly and empower them for lifelong learning. To do this effectively, we are introducing a 'Bring Your Own Device' (BYOD) policy for students in Years 7 to 12.

This policy is about more than just enabling students to have a device and connection to the College wireless network. We believe that placing the technology of choice into the hands of our students

- provides opportunity for individualised learning,
- increases independence, creativity, innovation and
- promotes self-initiated learning within and beyond the classroom.

1.2 This policy allows students to use the device with which they are most comfortable and with which learning will be most effective. Recognising the importance of choice, we are not recommending specific brands and models of devices. Instead, we are specifying the minimum requirements to which each device should conform.

1.3 Students, their parents or guardians must read, understand and sign the BYOD Acceptable Use Policy before students are given permission to connect to the College wireless network.

1.4 The BYOD Acceptable Use Policy also applies to students during school excursions, camps and extra-curricular activities or the like.

**For full Policy, see Administration**

In the first instance, the College minimum requirements to which each device should conform include:
